Subject: Microsoft - Justice Dept. Settlement

Dear Sirs:

I am just an average citizen, but I would like to express my opinion on the Microsoft settlement. It seems to me that all that would be accomplished by not settling would be to punish Microsoft for becoming a great company that the U.S. can be proud to call our own. All this so that the competition who would and does do the same marketing practices when they are given the chance can be satisfied. Our country was not founded on condemning free enterprise.
